We are pleased to offer breakout sessions to attendees.

In response to your feedback from the previous conferences, we will be presenting material that is both practical and quick to implement within your own practice. By mixing our plenary program with breakout/workshop sessions we believe this has been achieved.

All delegates are expected to attend plenary sessions.
For breakout sessions and/or workshops, we have allocated three separate rooms.
Room allocation may change due to the popularity of certain sessions.

Please indicate which breakout/workshops most interest you. Your responses will assist us in planning the best use of the facilities. Please check your program on the day for the correct room.
