*The Power to manage  
pain effectively*

RITM  
SCENAR AUSTRALIA

## Unique electrical impulses

SCENAR® is an advanced form of interactive neurostimulation using unique two-phase bipolar impulses. The electrical signals generated by the SCENAR® device are similar in form to the body's own endogenous neurological impulses. In this way the body does not recognise them as alien or invasive.

## Active interaction

The most unique characteristic of SCENAR® is that it can induce changes in the parameters of its impulse automatically based on the body's response to the treatment. The SCENAR® monitors the skin's reaction to the impulse and changes the electrical impulse it is sending out, providing maximal therapeutic effectiveness.

## Individually dosed influence

The device constantly measures the body's reaction to the signal and compares reaction times. The SCENAR® indicates treatment completion automatically on areas where the change of the reaction time is insignificant. This means the device has delivered just enough for the body therapeutic influence, called individually dosed influence.

## SCENAR Treatment Session

SCENAR® treatment sessions are normally an hour for chronic and 15-20 minutes for acute complaints.

SCENAR® Therapy is an individualised therapy and the speed of recovery will depend on how fast client's body will react. As a rough guide, acute problems may resolve in one to three sessions, while chronic issues may take longer.

The therapy is conducted by gently moving the device over the client's skin, and at times holding it stationary, depending on the treatment protocol. The client will feel a tingling sensation from the electrical impulses emitted by the device.

Treatment locations are usually the representation of the complaint on the skin but sometimes the spine, shoulders and abdomen areas may be treated for maximum effect.

Babies, young children, elderly patients and animals can benefit from SCENAR® Therapy.

Additional add-on electrodes are available for more efficient and convenient treatment.

### Benefits for your practice:

- The SCENAR® is small, hand-held device that requires no calibration, consumables or special maintenance.
- The treatment is non-invasive, painless and comfortable for patients.
- SCENAR® technology is proven to provide effective pain relief and faster recovery times. SCENAR® can be particularly effective on certain chronic conditions where other treatments have failed.
- Few contraindications: patients with pacemaker, pregnancy, acute infectious diseases, alcohol intoxication.
- Enhanced results from SCENAR® Therapy can lead to increased patient referrals.
- Compatible with other therapies.

RITMSCENAR® Professional devices are light-weight, portable and easy to use which deliver a non-invasive, interactive electrical stimulation via the patient's skin. The RITMSCENAR® Professional device range is designed for medical and allied health practitioners such as Physiotherapists, Veterinarians, Nurses, Chiropractors, Osteopaths, Rehabilitation Practitioners, Podiatrists, Massage and Sports Therapists.

## bioSCENAR® v2

The bioSCENAR® v2 is the most advanced and multifunctional model, incorporating all available functions and signal variables developed up to date in SCENAR® technology. Two Dose modes and three screening modes are available for identifying optimal treatment zones and monitoring the treatment process. Additionally, the bioSCENAR® v2 supports four SWING modes, providing the most possible signal variance, useful in treating chronic pain. With its 32 pre-built setting combinations, the practitioner can start using the device straight out of the box and provide effective treatment with minimal training.

## RITMSCENAR® Pro C

RITMSCENAR® Pro C is a midrange, yet powerful SCENAR® model, designed for Healthcare Practitioners who would like to complement their clinical practice with an effective pain relief modality. The device supports just enough functions used in most of the SCENAR® treatment protocols.

## RITMSCENAR® Pro Essential

RITMSCENAR® Pro Essential is an entry level SCENAR® device suitable for practitioners as well as home users, looking for a cost-effective and efficient pain management tool.

| FUNCTION/DEVICE         | bioSCENAR® v2  | RITMSCENAR® Pro C   | RITMSCENAR® Pro Essential   |
|-------------------------|--|---|---|
|                         |  |  |  |
| Display                 | Colour LCD display   | Colour LCD Display  | Colour LCD Display  |

RITMSCENAR<sup>®</sup> is a non-invasive, electrotherapeutic, hand-held device.

RITMSCENAR<sup>®</sup> delivers non-invasive therapeutic treatment on the skin to regulate physiologic systems of the body in order to relieve and manage different pain-related pathologies.

The RITMSCENAR<sup>®</sup> is a unique technology that stimulates the body's own healing capabilities.

## Compatibility with other therapies

---

When integrated appropriately, RITMSCENAR<sup>®</sup> treatment is compatible with most other therapies. Combining SCENAR<sup>®</sup> Treatment with the ULM Energy Blanket will over time gently restore the body's energy balance and rejuvenate the body. ULM Energy Blanket is an outstanding complement to the SCENAR<sup>®</sup> therapy or as a stand-alone treatment.

## SCENAR® Professional Training

---

RITMSCENAR® is a unique technology and a science on its own. It comprises of over 200 treatment protocols, developed and refined during the past 40 years. Clinical studies show that applying SCENAR® correctly delivers dramatically more effective and quicker results.

While, the Professional devices come with Operating Manuals and one-year free online training that covers basic treatment techniques, additional training is highly desirable for Practitioners.

Through our SCENAR® Practitioner Accreditation Programme, we offer three modules of training courses – Level 1, 2 and 3. Each level is a 3 days life seminar that covers theoretical and practical applications of SCENAR®. Over 100 treatment protocols are taught in the Programme and on completion, the student will be certified as an Accredited SCENAR Practitioner®.

- level 1** Basic knowledge about the device, functionality and the most common treatment techniques, practical applications.
- level 2** More variation and more protocols are introduced that help the holistic approach of SCENAR therapy.
- level 3** We refine some of the already learned techniques and introduce ‘condition protocols’. We teach provocation techniques that help to elicit a reaction from the body – or better the adaptive system.

Specialist courses are also available: Sports Injuries, Women's Health, SCENAR® Aesthetic medicine, SCENAR® for Equine, SCENAR® Meridian Stretch Technique.

Each course has an online component where students can learn on their own peice before and after the live seminar. A dedicated forum provides an additional resource for learning and keeping in touch with peers.

Mentoring sessions with our Authorized Trainers are organized on regular basis throught Australia and New Zealand.
